- Widely used in waste management, hazardous response, and other challenging industries.
- Fabric is white for high visibility

16

SHOE COVER (BOOTIES)

- Extra thick & waterproof design
- Waterproof & dust-proof
- Slip resistant and eco-friendly
- One size fits most

17

PURADIGM

Puradigm's patented, scalable purification products actively and safely purify both air and surfaces in any room. They can be customized for indoor spaces of all sizes, including homes, offices, schools, restaurants, gyms, hospitals, assisted living facilities, food processing facilities, and more. It is unique from other disinfection technologies (chemical cleaning, UV light, vaporized hydrogen peroxide) because it is used continuously. There are no downtime periods, chemical handling procedures, harmful residues, room clearance protocols, manpower requirements or adverse side effects. Using ambient air, the technology creates non thermal plasma that reduces pathogens safely while people are in the room. It is the most validated purifier on the market.

In addition to SARS-CoV-2, Puradigm's proactive technology has also been shown to be effective against many other pathogens including H1N1, E. coli, MRSA, Listeria, c difficile, staph, etc.
